

Full aluminium body

1/2" mounting standard

Hyper-Spherical
stylus

Pick it MC3

Robust and powerful sounding cartridge

MSRP 599 € (incl. VAT)

- **NEW** Pro-Ject Pick it MC series
- **NEW** cartridge design and colours
- Moving Coil principle
- Full aluminium body
- ARMCO pure iron cross coil
- Cryogenic treated cantilever
- High fidelity & dynamic playback
- High trackability
- Simple and fast mounting
- 1/2 inch mounting standard
- Threaded holes for simple mounting without nuts
- Steel blue finish
- Designed & assembled in Europe

Cartridge principle: MC (Moving-Coil)

Output voltage at 1 kHz: 0,4 mV (3,54 cm/sec)

Channel separation at 1 kHz: 30 dB

Tracking ability at 315Hz: 70 µm

Frequency response: 20 - 20 000 Hz +/- 1dB

Stylus type: Hyper-Spherical

Stylus tip radius: 5x250 µm

Tracking force, range: 1,8 - 2,2 g (mN)

Tracking force, recommended: 2,0 g (mN)

Height stylus tip to top mounting surface: 17,5 mm

Tracking angle: 20°

Recommended load resistance: 100-220 Ω

Break-in period: 30 hours

Cartridge weight: 9,6 g

Welcome to the Pick it MC world

We have extended our Pro-Ject Pick it lineup and are happy to announce the Pick it MC3 as part of our complete new MC cartridge range. Our goal was to create cartridges which technically match our tonearms and reach our vision of sound. Each Pick it MC cartridge pursues a different sound character, but all follow the same main goal to preserve a precise and musical reproduction of vinyl records.

The Pick it MC3 is an all-purpose cartridge which delivers powerful and dynamic sound optimised for pop and rock, but also for big orchestral classic.

Technical details

The Pick it MC3 uses a Pro-Ject specific „Hyper-Spherical“ stylus to pick up the micro information of your vinyl records. The cantilever is cryogenically treated, which realigns the crystal structure and allows a smoother signal transmission. The cross coil is made of ARMCO pure iron with 6N linear crystal copper winding.

It offers an output voltage of 0,4 mV and works best with a tracking force of 2 grams/mN.

Unique design

The body of the Pick it MC3 is made out of aluminium which is anodized in a beautiful steel blue finish which ensures a superior built quality and rigidity. The 1/2 inch mounting standard allows easy top-mounting with the threaded mounting holes. The included transparent stylus protector is easily slid onto the cartridge from the bottom to protect the needle when needed.

We were able to source high quality Japanese parts to design this outstanding cartridge. The assembly and quality control is done in Europe to ensure the highest possible sound quality.

You find all needed tools like screws and hex key in the box to mount the MC3. We recommend one of our „Measure it“ tracking force gauge and an „Align it“ to properly adjust the cartridge to reach the highest possible performance it is built for.
