Melco N1 series supports CD import from USB CD drive. Rather than use inferior drives designed for IT applications, MELCO has introduced a specialised optical disc drive optimised for high quality audio play and data transfer rather than high speed burst data for IT applications. This will give convenient bit-perfect CD import.

Additionally if the N1 is used with a USB DAC the D100 provides a superb real time CD Player into the DAC.

Designed primarily for use with MELCO, the D100 is also suitable as a high quality CD loader for PC or mac based computer audio systems.

FEATURES

- Audio specific high quality CD loader.
- Massive mechanical construction eliminates intrusive vibrations
- Convenient drawer loading mechanism for optimum disc handling and no risk of CD damage.
- USB3.0 connection to N1 USB3.0 port.
- Rear panel USB3.0 port to allow for Easy Music Import or Play from USB devices.
- Separate power supply with internal power supply management for optimum sound quality No setup required – just plug into USB3.0 port.
- Default import format uncompressed flac.
- Wav selectable.
