Melco N1 series has internal data storage optimised for audio. Anticipating machines being full to capacity, there is a simple EXPANSION port to allow easy addition of any USB3 HDD. However, an IT HDD will compromise sound quality. Melco E100 is the solution, with 3TB internal HDD, special power management and extreme mechanical systems ensure that the sound quality matches the internal storage of the N1ZH series.

FEATURES

- 3TB HDD – Sound quality matching N1ZH60/2
- HS-S2 - Melco Highly Stable Storage System as used in N1ZS/2A
- USB3.0 connection to N1 EXPANSION port
- Rear panel USB3.0 port for daisy chain additional storage
- Separate power supply with internal power supply management for optimum sound quality
- No setup required – just plug into EXPANSION port
- Massive mechanical construction – quiet and high sound quality.
